Newborn-unit admissions with ≥1 pSBI sign, n = 44,626
8 CIN hospitals, January 2021 to December 2024
Excluded: >30% missing
n = 237
≤30% of 14 clinical features missing, n = 44,389
One per unique combination of the 14 features, n = 7,994
Not sampled
n = 6,494
Study records, n = 1,500
300 sampled at random per triage category (seed 20261013):
Critical, Substantial, Moderate, Low, Minimal
Clinician evaluation sample
n = 200 records
40 per triage category
Eligible for the retrieval ablation
n = 1,300 records
one question per record
Review items, n = 800
200 records × 4 query areas:
assessment, investigations,
severity classification,
antibiotic course
First generation run
844 records used; 456 not yet tried
Each item to be rated by
three independent clinicians
[PLACEHOLDER: items rated,
raters, completed ratings]
Top-up run: 456 records tried once
136 added
Excluded: near-duplicate
of a selected record
n = 320
Holdout questions, n = 980
Critical 178, Substantial 214,
Moderate 198, Low 209,
Minimal 181
Excluded: no gold set
(answer cited no passage;
all antibiotic course)
n = 47
Analysed, n = 933
Assessment 234
Investigations 233
Severity classification 233
Antibiotic course 233
